CURVED-CHANNEL LAUNCHES | Constant right source

NUMERICAL ODE DEMONSTRATION · prescribed divergence-free flow · fixed magnetic-source geometry

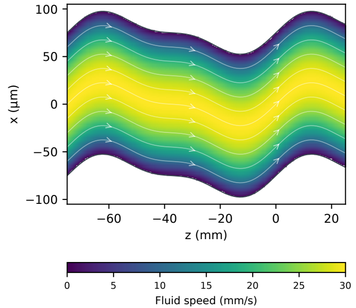

01 Magnetic input

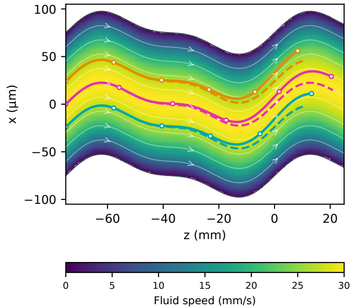

02 Magnetic field

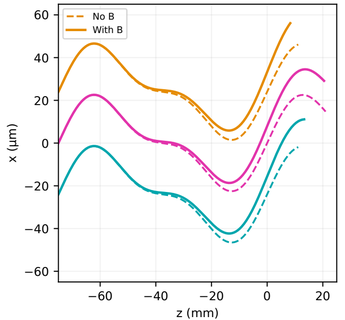

03 Curved fluid flow

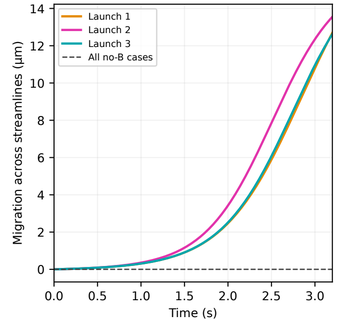

04 Particles in that flow

05 With / without B

06 Magnetic migration

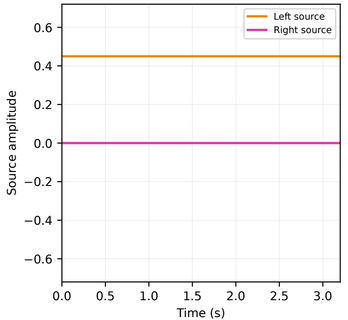

Solid: with B; dashed: without B. Orange / magenta / cyan: three identical paired releases. Open circles: equal time intervals.

No-field paths curve with the flow. Not Master10 inference; this new flow has not been used to train that network. Spatial axes use different units.

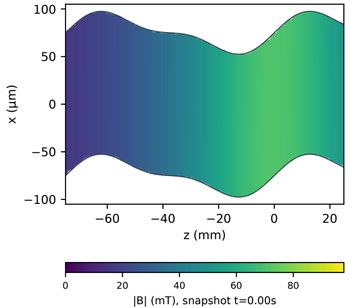

CURVED-CHANNEL LAUNCHES | Constant left source

NUMERICAL ODE DEMONSTRATION · prescribed divergence-free flow · fixed magnetic-source geometry

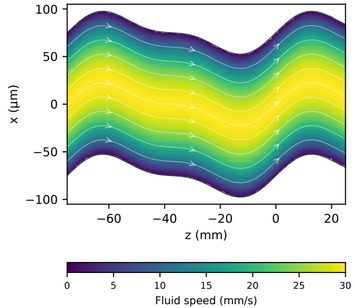

01 Magnetic input

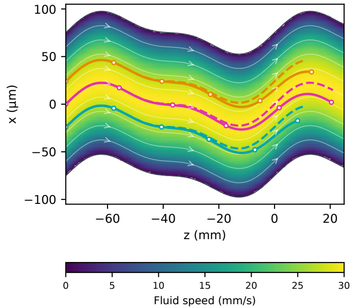

02 Magnetic field

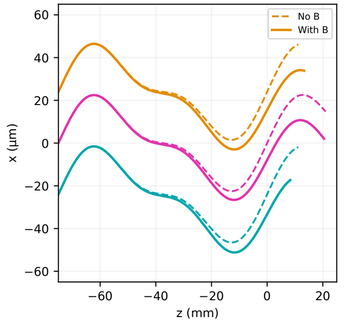

03 Curved fluid flow

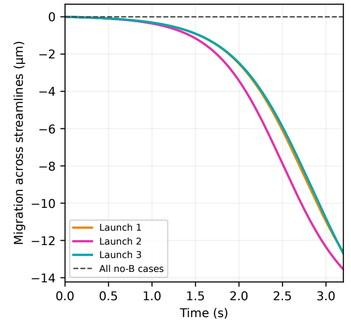

04 Particles in that flow

05 With / without B

06 Magnetic migration

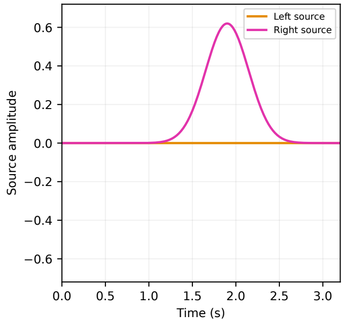

Solid: with B; dashed: without B. Orange / magenta / cyan: three identical paired releases. Open circles: equal time intervals.

No-field paths curve with the flow. Not Master10 inference; this new flow has not been used to train that network. Spatial axes use different units.

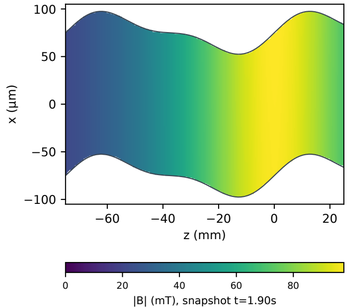

CURVED-CHANNEL LAUNCHES | Gaussian pulse on the right

NUMERICAL ODE DEMONSTRATION · prescribed divergence-free flow · fixed magnetic-source geometry

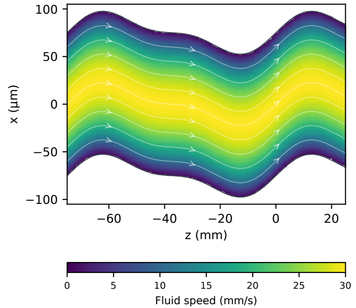

01 Magnetic input

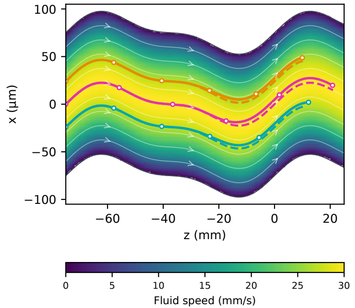

02 Magnetic field

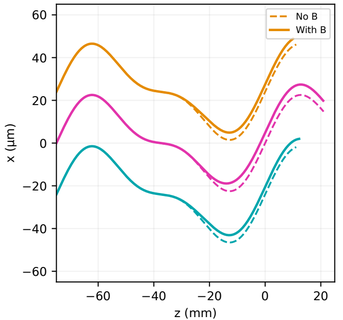

03 Curved fluid flow

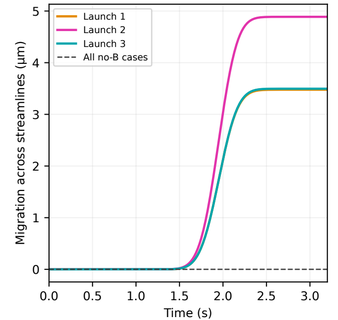

04 Particles in that flow

05 With / without B

06 Magnetic migration

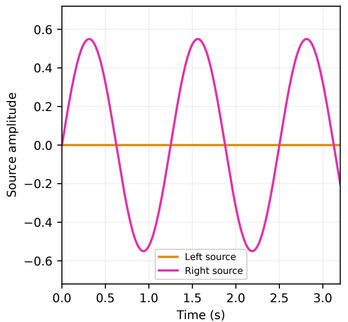

Solid: with B; dashed: without B. Orange / magenta / cyan: three identical paired releases. Open circles: equal time intervals.

No-field paths curve with the flow. Not Master10 inference; this new flow has not been used to train that network. Spatial axes use different units.

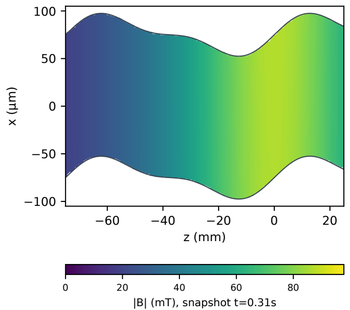

CURVED-CHANNEL LAUNCHES | Sinusoidal right source

NUMERICAL ODE DEMONSTRATION · prescribed divergence-free flow · fixed magnetic-source geometry

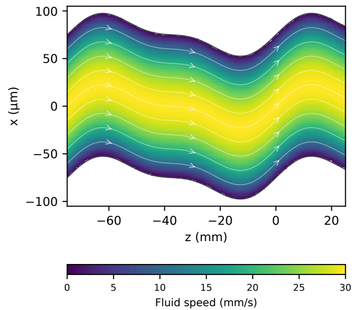

01 Magnetic input

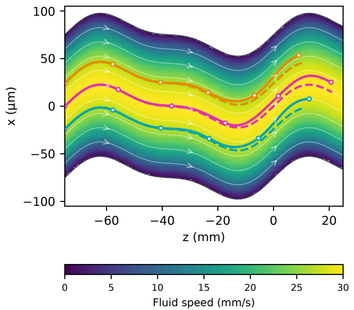

02 Magnetic field

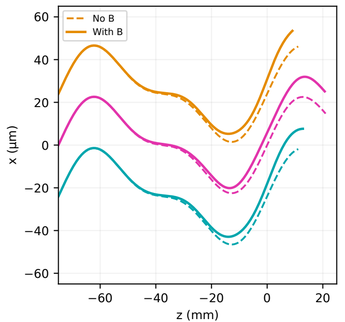

03 Curved fluid flow

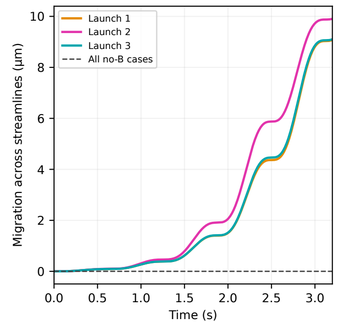

04 Particles in that flow

05 With / without B

06 Magnetic migration

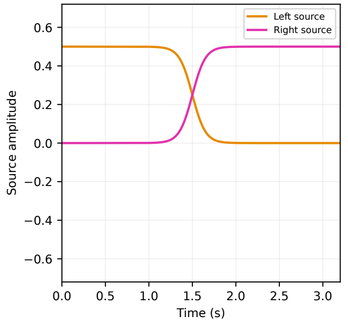

Solid: with B; dashed: without B. Orange / magenta / cyan: three identical paired releases. Open circles: equal time intervals.

No-field paths curve with the flow. Not Master10 inference; this new flow has not been used to train that network. Spatial axes use different units.

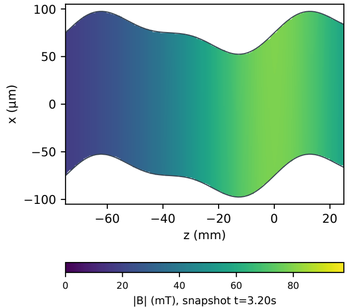

CURVED-CHANNEL LAUNCHES | Smooth switch: left to right

NUMERICAL ODE DEMONSTRATION · prescribed divergence-free flow · fixed magnetic-source geometry

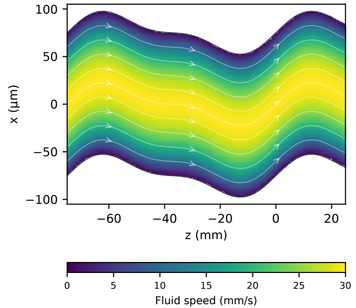

01 Magnetic input

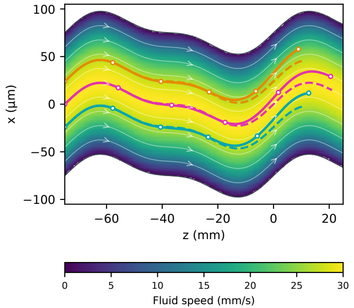

02 Magnetic field

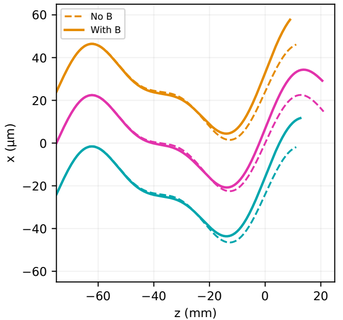

03 Curved fluid flow

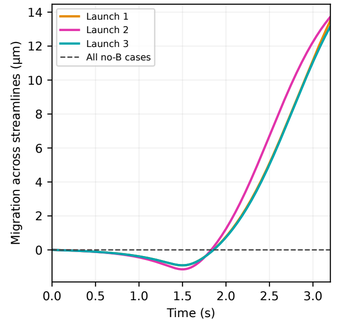

04 Particles in that flow

05 With / without B

06 Magnetic migration

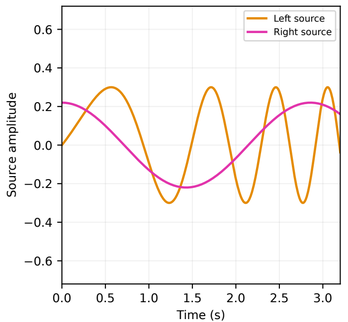

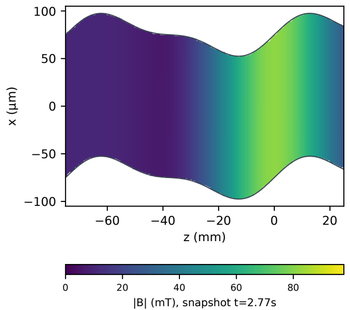

Solid: with B; dashed: without B. Orange / magenta / cyan: three identical paired releases. Open circles: equal time intervals.

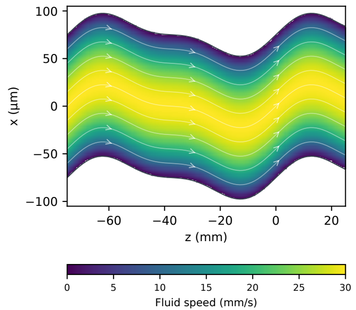

No-field paths curve with the flow. Not Master10 inference; this new flow has not been used to train that network. Spatial axes use different units.

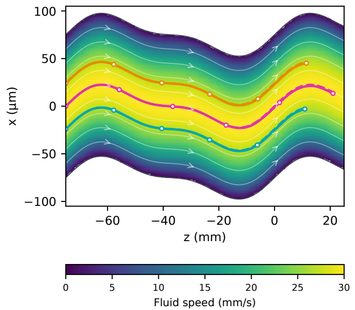

CURVED-CHANNEL LAUNCHES | Two-source chirp and cosine

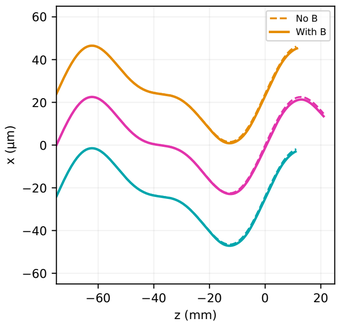

NUMERICAL ODE DEMONSTRATION · prescribed divergence-free flow · fixed magnetic-source geometry

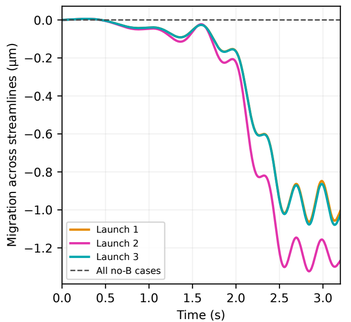

Solid: with B; dashed: without B. Orange / magenta / cyan: three identical paired releases. Open circles: equal time intervals.

No-field paths curve with the flow. Not Master10 inference; this new flow has not been used to train that network. Spatial axes use different units.
